

Lancaster House
5925 Shore Blvd. S.
Gulfport, FL 33707

Dear Lancaster Residents:

The following information is very important and we asked that you read it and keep it in your file.

It is important that you DO NOT REMOVE/UNPLUG OR TURN OFF THE NOTIFIER in your unit. If you do, it will cause the system to set an alarm (beeping) in the lobby. If this alarm (beeping) occurs, we must call for service. Service call on this system will be very expensive, if it is caused by a resident, removing, unplugging or turning off the Notifier. If you turn off the electric in your unit it will cause the notifier to sound off also. In either case the main system will let us know which unit caused the problem and it will be billed back to that unit.

If the smoke alarm goes off the light will blink. When this happens you can push the reset button on the smoke detector, or you could turn the circuit breaker to the furnace off and on again to stop the blinking light.

If we take these steps to avoid costly unnecessary service calls it will save us all money.

Sincerely,

President, Lancaster House
of Town Shores
